# Old Business

*STEADFAST AND LOYAL!*

# Issue

**Issue: Fire suppression system is inoperative in hangar Bldg. 7021.**

**Discussion: The fire suppression systems were repaired, however, one bay is still not functional. The unit does not store aircraft in this bay at night to eliminate the need for fire guards.**

**Recommendation: AVN BDE continue to track work order status and be prepared to post fire guards if severe weather plan is implemented.**

**Status: Closed at Division level**

**AVN BDE**

# Issue

**Issue: Parking pad deterioration.**

**Discussion: The parking pad is deteriorating due to weathering. This deterioration is causing a FOD and tripping hazard. The Unit and Airfield Operations have place this pad off limits.**

**Recommendation: Unit continue to conduct FOD walks and not use this pad.**

**Status: W/O# AF 100124, W/O# AF 100221P, W/O#AF 100143P, Tracked by HAAF and AVN BDE**

**Open**

**AVN BDE**

# Issue

**Issue:** Range fire fighting has placed personnel at risk.

**Discussion:** Range Control requires a 10-man fire fighting detail when conducting ranges during RED conditions. This detail is provided equipment and is accompanied by Range Personnel and a Unit NCOIC. Range Control does require the viewing of a safety video. Oversight and training of the team is the unit NCOICs responsibility.

**Recommendation:** That all Range Safety Officers and NCOs view the “new” video. Additionally, that all Soldiers view the video as units have time. Fort Hood Fire Department is available for fire fighting training.

**Status:** Closed

**AVN BDE**

# Issue

**Issue: Soldiers POV & service/delivery vehicles parking on sidewalks, grass, and other non-approved areas near barracks.**

**Discussion: FH 190-5 prohibits parking in these areas. This is creating a two fold hazard.**

**1-Increased fire and security hazard**

**2-Pedestrian hazard**

**Recommendation: That leaders enforce the standard of parking in only approved areas with reinforcement from SDOs/CQs.**

**Status: Issued Safety Bulletin with requirements. However, there are still 4ID personnel parking in unauthorized areas. Leaders must address at Soldier level.**
